If purchasing shipped eggs, please check your eggs for cracks etc. carefully before you set them in an incubator. That is why we send extra eggs. Let your fertile eggs sit in a cool room with the fat end up for 24 hours before incubation. We incubate at 37.4C with a humidity of 46-47%. On hatch day we raise the humidity to 49-54% for my chick, duck, turkey & goose eggs. The incubator humidity may rise as high as 56% during the hatch. Happy Hatching☺
